Description of the Proposal

Please note in regard to:

- **Fire Statements** - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. [View government planning guidance on fire statements](#) or [access the fire statement template and guidance](#).
- **Permission In Principle** - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.
- **Public Service Infrastructure** - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or [view government planning guidance on determination periods](#).

Description

Please describe details of the proposed development or works including details of proposals to alter, extend or demolish the listed building(s)

The proposal is the restore and refurbish the building to be used as offices. The works will be both internal and external.

Externally, the main, historically important, street façade will be sensitively restored and repaired. This includes a restoration of the original façade aesthetic, with the reinstatement of historically accurate sash windows, the upgrading of rainwater goods, and general conservative repair including re-pointing. The roof will be repaired and upgraded, with the upgrading of rainwater goods detailing where possible.

Proposed internal works include the removal of historically inaccurate additions, the repair and restoration of original features, and the re-ordering of some spaces to enhance the functioning of the building as offices. Where possible, original features will be reinstated.

To the rear of the building, an historically inaccurate extension, which adds nothing to the reading of the building, will be demolished, and rebuilt as an extension with a staircase that improves the internal circulation and fire safety within the building.

The Mechanical services in the building will be upgraded in line with current requirements.

Year

1960

(Date must be pre-application submission)

Please provide a brief description of the building or part of the building you are proposing to demolish

The portion to be demolished is a two-storey infill extension within the former rear courtyard, with a glazed rooflight above. This has been built to cover in the portion of land between the rear return and the adjacent property. The portion of land would have originally been a garden to the rear of the main house. It is assumed that the structure dates to the 1060's. There is an existing bitumen felt flat roof which is experiencing water penetration

defects. In the centre of this flat roof is a dilapidated Georgian wire glass skylight - approximately 9m by 1.7m in size. It is believed that the majority of the water ingress is occurring around the service penetrations from the rooftop plant down through the roof deck itself.

The existing skylight consists of several panes all Georgian wire glass held together with putty and 'duck-tape'. The skylight is single glazed and contributes to an uncomfortable working environment in the Office space below (hot in summer and cold in winter). In addition, the lead flashing along the party wall line is in poor condition and there are signs of leakage on the underside of the roof along the party wall.

The application seeks to replace the existing single glazed roof light with a new double glazed rooflight with a smaller opening.

Why is it necessary to demolish or extend (as applicable) all or part of the building(s) and or structure(s)?

To improve the construction, provide higher headroom within the spaces and construct an extension whose construction methods meet modern standards. The new extension will have a staircase, that will serve both as a circulation route and as a secondary staircase in the event of a fire.
