2. Inform the Building control department that the works are about to commence on site after receiving an approved decision from planning / building control in writing for your proposed works.

3. Verify boundary lines & ground conditions including checking positions and new connections of all gas; electrical, water & other services drainage ect. within the site prior to the commencement of excavations. Owner is responsible for establishing own boundary lines as DPL are not responsible for checking land ownership even if drawings have been approved by the planning and building control departments. If uncertain a land search should be carried out by the homeowner/contractor.

Where works involve demolition to ensure that all elements of the building and adjoining structures are accounted for and that all necessary propping and tempor supports are in place. To not scale off this drawing as the scaling may be off Works carried out under a building notice or prior to approval of drawings are at contractors/owners risk. (all DPL drawings must be approved before works commer Builders building without plans being approved by planning & building control departments are fully responsible for the littlefibood of condemned works.

bullars bullaring witnout poins being approved by planning a bullaring control departments are fully responsible for the likelihood of condemned works.

9. Any discrepancies, either between written and site dimensions or between this drawing and other consultant's or suppliers drawings, should be brought to the immediate attention of DPL before executing the structural, drainage, mechanical and electrical works. This includes types of materials if materials shown on drawings do not match which is on site then this will need to be brought to DPL attention straight away before works commence and purchase of materials be made so an alternative design can be rechecked and approved by building control or the engineer before works con commence. O.All of DPL structural designs are subject to footings being im deep, if however the existing foundation is different a trail-hole will need to be dug to establish the existing foundation type and building control eigher a roft or piled foundation, this will need to be designed by an engineer with an additional cast being inplemented.

1.All well/s which have been designed to be removed on plans are to be checked on site by building control inspector/builder for load bearing or non-load bearing status before purchase of steel/s. If non-load bearing then steel's should not be ordered. No refund or claim can be given against DPL on the design/materials charged for these steel/s.

OTHER NOTES:

these works, any company, department or person that infringes these rights will be subject to legal compensation prought against them, client accepting these terms has agreed on all the above by signing contract between by prarty's and understands that no refunds can be given.
