 Title: External Finishes Schedule - Block ABC  
 Drawing: ARP3-PTE-ZZ-ZZ-SH-A-05601  
 Status: S4- FOR STAGE AUTHORISATION  
 Revision: P2

Revision	Date	Description
C1	21.07.2022	Issued for Stage 3B Tender
P1	21.09.2023	Issued for Stage 4
P2	26.09.2023	Issued for Planning Condition 3

All products to be installed according to manufacturers's recommendations

For details refer to Architects Drawings

To be read in conjunction with Employers Requirements and tender drawings - Contractor to raise any discrepancies for clarification

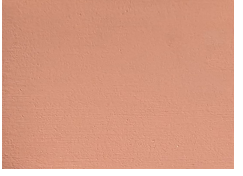

Any material within the external wall assembly and/or build-up, including specified attachments, i.e., balconies, will be required to achieve Class A2-s1, d0 or Class A1 fire resistance

Material palette illustrated at end of schedule.

### External Finishes Materials

Planning Key	Code	Material	Name/ Finish	Additional Information	Manufacturer	Swatch	Location
B1	B1	Facing brick	Pink tone brickwork with flush, colour matched light mortar with flush joints	Horizontal stretcher bond	Nelissen Rosado		Block A / B / C / D
B2	B2	Facing brick	Pink tone brickwork with flush, colour matched light mortar with flush joints	Vertical stretcher bond	Nelissen Rosado		Block A / B / C above and below windows/doors

Project: **19-049 - Abbey Area Phase 3**

 Revision: P2

B3	B3	Facing brick	Pink tone brickwork with flush, colour matched light mortar with flush joints	Corduroy (15mm projection every other brick course with 15mm projecting base datum - see elevations for locations of base datum)	Nelissen Rosado		Block A / B / C ground floor
C2	C2	Facing brick	Pink tone brickwork with flush, colour matched light mortar with flush joints	Triple stretcher course detail with top course projecting 15mm and bottom course recessed 10mm.	Nelissen Rosado		Blocks A / B / C
Z1	Z1	Glazed brick	Celebratory entrance lined in green masonry to complement brickwork	Stretcher bond with dark mortar	EH Smith glazed brick - Eden Green		Block A / B / C ground floor front/rear entrances and portico
Z3	Z3	Concrete inset balcony	Pink colour concrete balcony deck. 50mm projection and ca. 327.5 mm horizontal extension.	Inset balconies shall be insitu visual concrete, thermally broken from the internal slab by proprietary cast in thermal breaks (unless specified otherwise).	To structural engineer specification. Approval required by client and architect. Painted finish Keim Soldalit 9186		Block A / B / C inset balconies
Z4	Z4	Pre-cast lintel	Pink colour precast banding with 50mm projection and ca. 327.5 mm horizontal extension into brickwork.	Precast feature banding, colour to match inset balcony slab (Keim Soldalit 9186)	To structural engineer specification. Approval required by client and architect. Painted finish Keim Soldalit 9186		Block A / B / C lintel to top floor inset balconies

**WINDOW/ DOORS/ LOUVRES**

Planning Key	Code	Material	Name/ Finish	Additional Information	Manufacturer	Swatch	Location
W1/2	Refer to external window schedule and GAS	Timber composite / aluminium window frames	Timber composite / aluminium window with 190mm brick reveal. Window frame colour RAL 7047. Cill in PPC metal oxide (RAL 3012 Beige Red)	Refer to PTE Window & External Door Schedule and External Door Types drawings. Steel support plate to window to SC design	Nordan window fixed to manufacturer's details		Blocks A / B / C
M8	EDT-03	Primary entrance door	Main entrance doors in RAL 6020 MATT to match main entrance green glazed bricks (Z1)	Schuco entrance door or similar approved, fixed to manufacturer's details. Refer to PTE External Door Types drawings	Schuco or similar approved.		Blocks A / B / C Front entrance doors
M8	EDT-05	Secondary entrance door	Rear entrance doors in RAL 6020 MATT to match rear entrance green glazed bricks (Z1)	Schuco entrance door or similar approved, fixed to manufacturer's details. Refer to PTE External Door Types drawings	Schuco or similar approved.		Blocks A / B / C rear entrance doors
W1	Refer to external door schedule and GAS	Timber composite / aluminium doors	Timber composite / aluminium window with 190mm brick reveal. Window frame colour RAL 7047.	Refer to PTE Window & External Door Schedule and External Door Types drawings. Steel support plate to window to SC design	Nordan window fixed to manufacturer's details		Blocks A / B / C balconies

M3	Refer to louvre schedule and GAs	Powder coated aluminium louvres	PPC aluminium, RAL 3012 Beige Red unless specified otherwise below (M10). External sealant to match metalwork. See Window & External Door Schedule and External Door Types drawings for additional comments.	Louvre to bin, bike and plant rooms External sealant to match frame colour	Manufacturer yet to confirmed		Blocks A / B / C ancillary spaces
M9	Refer to louvre schedule and GAs	Steel door system.	PPC aluminium, RAL 3012 Beige Red unless specified otherwise below (M10). External sealant to match metalwork.	Metal louvred doors powder coated to classification A2-s1, d0. External sealant to match frame colour. Substation doors subject to PowerOn approval.	Manufacturer yet to confirmed		Blocks A / B / C / D ancillary spaces
M9	Refer to louvre schedule and GAs	Steel door system.	PPC aluminium, RAL 7038 . External sealant to match metalwork.	Metal louvred doors powder coated to classification A2-s1, d0. External sealant to match frame colour. Substation doors subject to PowerOn approval.	Sunray Doors to substation.		Substation (Block D )
M10	Refer to external door schedule and GAs	Steel door system.	PPC metal louvred door system (RAL 6020)	Metal louvred doors powder coated to classification A2-s1, d0. External sealant to match frame colour.	Manufacturer yet to confirmed		Blocks B / C refuse stores
M7	Refer to metalwork schedule and GAs	Metal openings to cycle stores	PPC 15x100mm frame to door leaf and opening, RAL 3012 Beige Red. 8x50mm full height vertical metal flats twisted at staggering heights.	Variation of brick headers and louvres above doors - check GAs for locations.	Specialist contractor. Approval required by client and architect		Blocks A / B / C cycle stores and external cycle store (Block D)

Comments from Design Officer	Response
<p>We agree white window frames might not be the most appropriate tone. What colours did you consider other than the more greyish one?</p>	<p>One of our key design objectives for Abbey Phase 3 was to look to the rich quality of buildings in the conservation areas to inspire the architectural language of the proposals. This included referencing the bays, horizontal banding, tones and window design. The tonal design of the scheme sat somewhere between the pastel/earthy/white tones of the conservation area and the darker reds/purples of the Phase 1 block along Belsize Road. We felt that lighter window frames not only referenced the local context but also provided a lighter relief to the pinky tones proposed for the brick, metalwork and concrete across the three blocks. At planning we proposed a pure white frame, but upon reviewing samples, we felt a slightly darker tone provided more warmth whilst also maintaining the strong design principles at planning. We have attached a link below of a scheme by Morris + Company which successfully use a lighter grey window frame within a similar scaled red toned building.</p> <p><a href="https://morrisand.company/work/hampstead">https://morrisand.company/work/hampstead</a></p>
<p>In regards to the bricks... are you able to point us at examples of built projects where the same type of brick (including the tone) has been used?</p>	<p>Some built examples using the Nelissen Rosado brick can be found on the manufacturer's website. Please click in the link below (click on 'images' to the bottom left of the brick stock photo if the projects do not show when opened)</p> <p><a href="https://www.nelissen.be/en/products/facingbrick/bricks/rosado">https://www.nelissen.be/en/products/facingbrick/bricks/rosado</a></p>
<p>Also, having reviewed the drawings and photos from our site visit, I noticed that in the sample panel drawing it says the mortar is flush, but in the built sample it looks like it is slightly set back (see image attached). We think that a setback works better rather than having it flush, as this could make the façade look too flat and the mortar appear too prominent, creating an imbalance between brick and mortar.</p>	<p>The mortar is to be colour matched and flush as per the built sample panel. Due to the nature of the brick, which has a rugged and irregular sandy surface, the flush mortar is intended to blend in with the brick and enhance the irregular rugged surface. A calm, sculptured approach to the main building with visual interest coming from the layering and hierarchy of materials and building elements, will ensure the building elevations do not feel flat. The elevations benefit from chamfered corners and stepped heights, projecting balconies on the garden elevations, chamfered inset balcony openings forming bay windows along the streets, coloured concrete balcony slabs that protrude from the brick face, deep window reveals of 190mm, and recessed/projecting brick banding to all floors.</p>
