Subject: Grounds of Appeal for Lack of Response to Consent to Display Advertisements Application

I am writing to formally appeal the lack of response to my Consent to Display Advertisements Application, submitted to Camden Council on Monday 30th Jan 2023. As per the regulations and guidelines set forth, I had anticipated a response within the stipulated 8-week timeframe. Unfortunately, I have not received any correspondence or acknowledgment of the application from the council.

I would like to bring to your attention the following points which have prompted me to file this appeal:

Non-Communication: Despite adhering to the submission guidelines and providing all necessary documentation, I have not received any form of communication from the council regarding the status of my application. The lack of acknowledgment or updates has left me uncertain about the progress of my application.

Legal Obligation: The council has a legal obligation to provide timely responses to applications submitted by citizens. Failing to do so not only undermines the transparency of the process but also denies applicants the opportunity to make informed decisions.

Loss of Opportunity: The delay in processing my application has caused a significant inconvenience and potential financial loss. The consent for displaying advertisements is time-sensitive and directly impacts my ability to conduct business efficiently.

Impacts on Planning: The non-response has hindered my ability to plan effectively and make necessary adjustments based on the council's decision. This uncertainty negatively affects my business operations and future strategies.

In light of the above circumstances, I kindly request that the council:

Acknowledge Receipt: Confirm the receipt of my Consent to Display Advertisements Application as soon as possible, providing a reference number for future correspondence.

Expedite Review: Expedite the review process of my application and provide a decision within a reasonable timeframe, considering the delay I have already experienced.

Transparency and Communication: Ensure that timely updates regarding the status of my application are provided, along with any additional information or documentation required for the process.

Compensation for Delays: Consider providing compensation for the loss and inconvenience incurred due to the delayed response, as well as potential financial implications.

I believe that addressing the aforementioned concerns will not only rectify the current situation but also uphold the integrity of the council's processes and the rights of its citizens.

I look forward to a swift and favourable resolution to this matter.
