Canopy of T1 & T2 selectively reduced back to provide a clearance of 1m from the building line. All works in accordance with BS3998:2010.

Arboricultural supervision in place when foundations removed from within RPA and further excavation works undertaken.

A protective barrier will be set up to prevent collision damage occurring to the trees during works, where permitted on the public highway. Demolition works, deliveries etc will be undertaken in a manner to ensure the trees are suitably protected.
