Dear Sir/Madam

I strongly object to the retrospect application for installation of air source heat pump within enclosure in rear garden of 25 Glenmore Road.  
Our streets are quite densely populated and it is our concern to keep noise levels to an absolute minimum. The noise of an air source heat pump is an imposition to the neighbours as it can be heard outside the property 25 Glenmore Rd.

Please help us make sure that our residential neighbourhood remains free of noise pollution.

Many thanks for considering our views,  
Bettina Metcalfe  
Howitt Road
