| 2023/4151/T | Alex Joss | 25/10/2023 20:56:28 | OBJ | <p>We didn't object to the building works planning application (2022/3470/P), because the supporting Arboricultural Survey & Impact Assessment report highlighted the two trees (T7 and T8) for protection, not felling !!!</p> <p>Our flat faces directly onto these trees. They're provide a sense of calm and help uplift my mental health, significantly, on a daily basis. I fear I will be distraught if they are removed. They provide nature and character to many other properties on our street.</p> <p>As evergreens they are an essential part of the broader gardens ecosystem. We see birds nesting in them frequently. They provide natural beauty and visual cover from all the flat across the gardens. They provide meaningful (really!) light pollution from the proposed home during winter.</p> <p>I strongly object. We've just moved into the area, which we admired a conservation area. I trust this will prove to be the case.</p> |
