Subject: 2023/4438/T 29 Hampstead Lane London N6 4RT

As can be seen in the photographs below, this is a prominent tree along Hampstead Lane providing all the benefits that trees confer and adding to the character of the road and the Conservation Area.

It is worthy of a TPO

The tree should be preserved, though the Tree Officer may consider it appropriate to prune the tree as was allowed under application 2016/4739/T.

As for the wall, the applicants may find it effective to remove some of the hard standing around the tree allowing water to reach its roots. Alternatively they should rebuild the wall around the tree as has been effectively done with other front walls in the area

Please attach both the comment, objection, and photos to the application, 2023/4438/T
