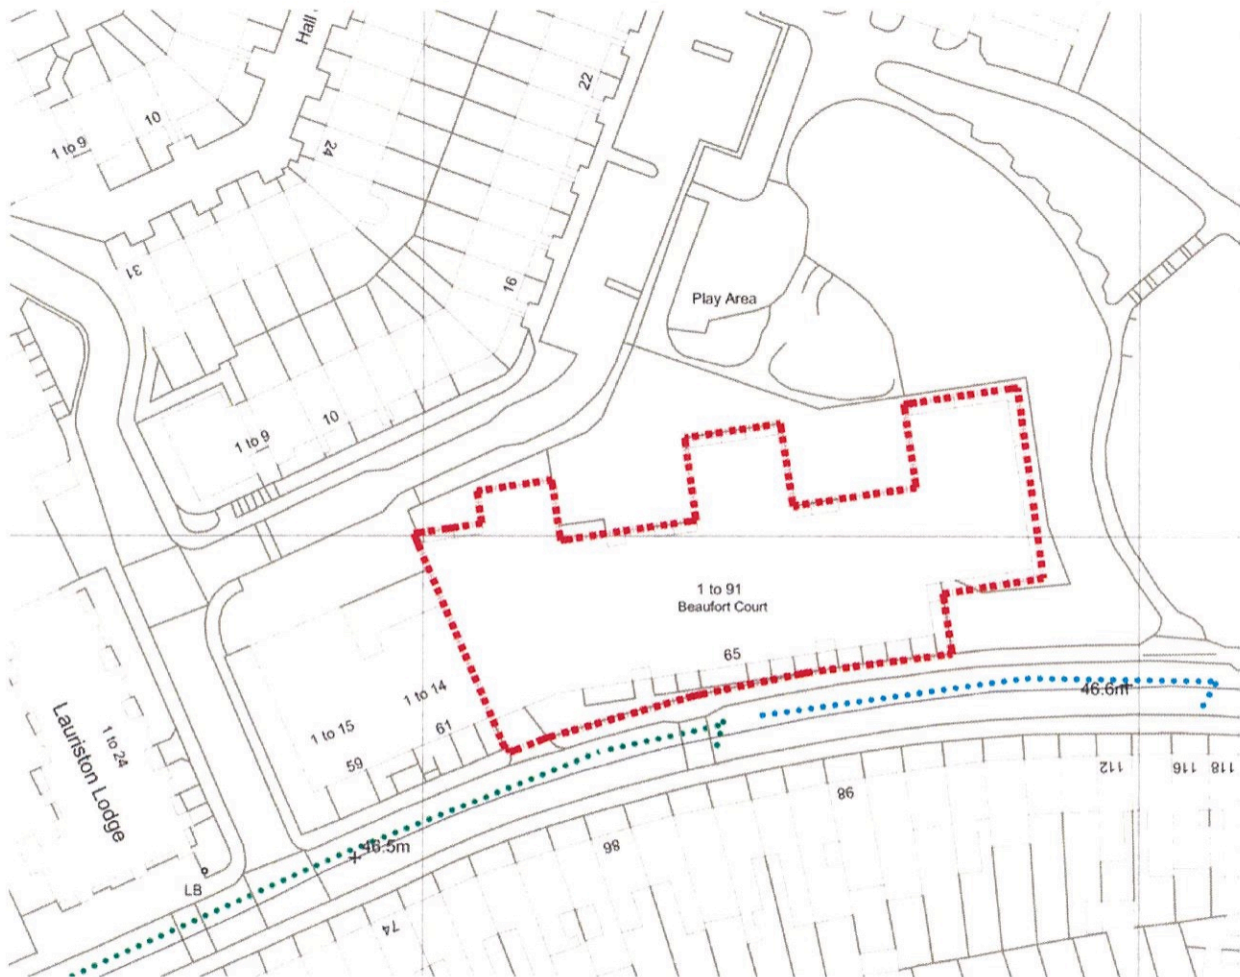

Figure 3. Deliveries

2.6 Deliveries

Deliveries should be planned between the hours of 8.00 and 16.00 Mon-Fri only so as to cause minimal disruption to surrounding properties. Any vehicle arriving at site will notify the site supervisor who will ensure a trained banksman if available to assist.

Access to site will be strictly via the agreed designated routes to avoid any potential impacts, conflicts and hazards. Junctions and parts of the surrounding network with potential concern have been identified in the following plan. All road users have been considered with particular attention paid to pedestrians and cyclists around access to the site.

A copy of this route plan or later revision will be given to all suppliers when orders are placed to ensure drivers are fully briefed on the required route to take. Suppliers will be made aware that these routes are required to be followed at all times unless agreed. Green indicates the direction of deliveries on approach and blue those leaving the site.
