

EXISTING FRONT ELEVATION

APPROVED FRONT ELEVATION  
Planning approval reference 2022/2202/P  
Granted 01.02.2023

PROPOSED AMENDED FRONT ELEVATION

SCHEDULE OF PROPOSED MINOR AMENDMENTS:

- On the right hand side there was going to be a mid grey perforated metal panel. This is proposed to be replaced by a mid grey zinc panel to match adjacent. This small change is proposed for cost saving and practicality reasons. Please refer to approved drawing 'P-P-02 revision B' (a copy of which is included in this submission) to see location on second floor plan, highlighted with a red circle).
- The glazing in the triangle under the roof has been replaced by zinc to match adjacent. This is in order to prevent overheating.
- Minor tweaks to positions of glazing bars. This is for practicality reasons.
- The zinc roof edge has been made a little more expressive. This is to make the design more unified - to make the front roof edge more similar to the back roof edge. Please refer to approved drawing 'P-P-05 revision B' showing the back elevation for comparison.
