

TECHNICAL DATA SHEET

BauderGREEN WB native wildflower blanket

A British grown vegetation Blanket designed for use on green roofs. Containing a broad mix of UK native wildflower species. Suitable to be laid on BauderGREEN SUB-BM UK biodiverse substrate.

Intended Use

BauderGREEN WB native wildflower blanket contains a broad mix of British Wildflower species, grown in substrate on a coir carrier (which is 100% biodegradable). The natural fibres of the coir carrier promote the rapid rooting of the blanket into the substrate below. The product is typically installed over BauderGREEN SUB-BM UK biodiverse substrate (see Technical Data Sheet). The vegetation is a mix of hardy Wildflowers, annuals, and herbs. The vegetation is cut back in the summer prior to delivery to reduce plant stress.
