In full support of local councillors.

Please could you note the follow objection under my name too:

Although this proposed edifice is in HCG ward it will cast a shadow over the historic Bloomsbury conservation area which I represent, and as tall buildings inevitably lead to clusters, I very strongly support the objections from local residents on both sides of the ward boundary and the representations made by my colleagues in the neighbouring ward.

David

Can you add my name to Cllr Fulbrook's objection?

Cllr Madlani is reviewing this now and may add his name too.

Thanks

Awale

Currently in the USA but flying home today.

We do object to the proposal and will file a formal objection and request to speak at the Planning Committee.

As currently advised, and I have not had the time to go over any final adjustments, if any, one would have hoped that the application would have

been promptly rejected by officers on obvious grounds: height and bulk; prior fraud about the housing element; inappropriateness in the neighbourhood of historic buildings and conservation area; failure to consider retrofit (M&S Oxford Street not far away comes to mind); effect of demolition on our constituents; a flagrant and calculated refusal to have any meaningful consultation with local residents, etc.

Yours in sorrow that our local residents are facing once again a mammoth scheme despoiling the neighbourhood and seemingly without the protection of planning officers against this blight.

Julian
