To: Planning Committee
Subject: Application 2023/2510/P

Dear Committee

It is imperative that this monstrous proposal is rejected by the planning committee which defies logic and would provide a blight on the landscape of Camden.

The proposal is incompatible with the urban landscape and will overshadow in all respects the British Museum.

Perhaps this is an attempt by the developers to secure a reduced scheme with a subsequent application by the use of shock tactics which is a common approach in the development process!

The committee should respect the reports submitted by the guardians of the neighbourhood such as English Heritage and at a local level the Covent Garden Community Association.

Let's hope that common sense will prevail and the application will be rejected out of hand despite the "cash incentives"

Yours faithfully

Peter J Robson BSc, MRICS
