

Dear Camden council,

I am writing to object to the felling of trees on Museum Street. I object because:

- 1) This is a built up area in need of trees.
- 2) Other building options should be explored.
- 3) Buildings should not be constructed at the expense of trees.
- 4) The tree per square mile in this area is already low.
- 5) This goes against the government agenda of meeting net zero.

I would like a full explanation detailing why the felling of these trees has been proposed.

Yours sincerely,

Stephanie Davis
