

Dear Planners,

I have looked up this planning application but I am unable to see any drawings of the position of the proposed condensers. How can I see them? The planning application simply says 4 condensers are to be installed on the first floor roof terrace. This terrace is just outside my window and above my back garden and I am anxious that the noise of these machines will be intrusive. I would like to object.

Please let me know how I can see the drawings for the exact position proposed for these condensers.

Kind regards
Angela Andersen
