Design and access statement

- We are asking for approval for a security camera and alarm system to be fitted on the outside of our storefront. We have already had one theft from our store and the local policy authority have requested use of footage from this camera so we do feel it is crucial we have both fitted for security of not only our store and staff but for the rest of the street.

Images attached are of the alarm system and camera, they sit to the side and out of the main view of the shop and do not effect any other store or resident.
