2023/0228/P	Nicholas Ayre	23/11/2023 22:15:19	OBJ	<p>My home office and bedroom is directly above the installed office air conditioning units. In summer we have the windows to both rooms wide open to ensure they stay cool.</p> <p>During the summer months the office aircon units will be working their hardest to keep the offices cool and be most noticeable in my office and bedroom.</p> <p>Reading the acoustic report, I am concerned that without suitable attenuation the operational noise of the new units will be noticeable above the existing background noise. Any grant of planning should be on the basis that the units are suitably attenuated and only permitted to run during office hours and turned off over the weekend and after hours.</p> <p>We do not want a repeat of the noise issues we had with Fitness First which lasted for 17 years and ended up in a court case for nuisance.</p>
