2023/3646/P	James Fox	09/12/2023 14:39:01	OBJ	<p>The noise disruption continues to be a significant problem. The situation has deteriorated with increased noise disturbances on the 28th and 29th of October, following similar disruptions on October 2nd and 3rd, 2023.</p> <p>And more recently Saturday 9th December 2023 - 2pm.</p> <p>I reiterate my belief that relocating the equipment, specifically the air intake fan/s, to the opposite side of the wall—outside the boiler house of the basement flat at 80 Camden High Street—remains a crucial measure in mitigating the noise issue. Implementing this adjustment could significantly enhance my quality of life and well-being.</p> <p>Despite the recommendations outlined in the noise report, there is no concrete evidence to suggest that the necessary works have been undertaken to address the ongoing noise problem. This lack of progress raises significant concerns about the impact on my health and overall living conditions.</p> <p>I was never consulted about the installation of this equipment, and I have not provided consent for its presence. Regrettably, the sustained noise nuisance has caused severe health issues, making my living conditions unbearable.</p>
