Dear Mr Campbell,

I have seen the correspondence between you and Hadley Freeman and the letter that Lord Triesman has sent. I want to associate myself completely with the sentiments expressed in their correspondence with you as a fellow Primrose Hill resident.

As someone who has worked in audio/broadcasting my whole career, I have a sense of what 103 decibels sounds like. It is unbelievably loud, and cannot imagine how permission could be given for an industrial unit that will be emitting that kind of noise in the conservation area.

Further I hope the consultation period will be extended so that there is more time for residents to make clear their concerns.

Yours sincerely,

Jon Sopel
