

Green Roof - Maintenance Schedule

Roof inspection

Sedum roof to be inspected twice a year in spring and autumn for weeds and seeds (carried by the wind) and unwanted vegetation removed manually. To encourage bio-diversity no chemical pesticides to be used. Any leaves blown into the gutters and drains to be removed.

Fertilization

Fertilise green roof twice a year in late April and early September.

Irrigation

Under very dry conditions the green roof to be irrigated.

85mm deep trays to promote healthy root system and drought tolerance
8 different varieties of Sedum.

GENERAL NOTES

All work to be carried out in strict accordance with current Building Regulations and it's latest amendments, and to the complete satisfaction of the Local Authorities Building Control.

Contractors are responsible for complying with all relevant BS etc.. and check that Building Control and Environmental Health Departments are satisfied with the scope and content of all work on completion and obtain any necessary certificates.

All existing construction levels and dimensions to be checked on site prior to construction. Do not scale.

This drawing to be read in conjunction with all relevant Engineers and specialist drawings
