

FACT SHEET SEMPERGREEN® CLICK 'N GO SEDUMTRAY

MATERIAL

The Sempergreen® Click 'n go Sedumtray is a container made of recycled HDPE. The precultivated trays comprise six to eight different species of Sedum. The Sedum plants grow on a special substrate developed by Sempergreen®. The Sempergreen® Click 'n go Sedumtray boasts at least 95% coverage upon delivery. The sebaceous Sedum plants are adept at storing water in their leaves and are therefore extremely suitable for varying weather conditions.

APPLICABILITY

The Sempergreen® Click 'n go Sedumtray is a ready-to-use tray that can be applied directly on the roof for an instant green result. This tray is applicable on flat and slightly sloping surfaces of up to 15 degrees.

DELIVERY AND INSTALLATION

The Sempergreen® Click 'n go Sedumtray can be ordered by piece. Each tray measures 45.0 x 49.5 cm. For the outer row of trays, please take into account a size of 49.5 x 49.5 cm per tray.

Sempergreen® Click 'n go Sedumtrays are very easy to install. The trays can be clicked together. To protect the roofing we advise to place a protective cloth underneath the trays.
