Utopia Village, Chalcot Road NW1

We do care and, politely request, or indeed demand that consultation be substantially extended.

We need to be able to understand the rationale of permitting industrial equipment in a residential area. Is the Camden Local Plan of no relevance here?

It appears this addition to the original planning application has been 'snuck' in whilst we are all too busy with year-end activities to notice or indeed care.

This addition will impact on the lives of many families living in Gloucester Avenue, Chalcot Road, Edis Street and Egbert Street and indeed will impact on Primrose Hill as a whole.

We need some serious Community Planning here but in the first instance we need an extension of the consultation period and a meeting with the applicants and their architects and relevant consultants.
