To whom it may concern

Re: Planning application 2023/3777/P

Installation of air conditioning units 24-28 Bloomsbury Way WC1A 2SN

We live at flat 10 Russell Chambers and wish to strenuously object to the above planning application

Noise pollution

The back of our flat is directly opposite to where the air conditioning units are to be installed. The continuous noise of the units would affect us, especially at night and if we have the windows open. The noise would also be amplified due to the position of the proposed air conditioners.

Environmental issues

The UK has a temperate climate and installing air conditioning for the odd hot days in summer is both wasteful in energy due to electricity consumed as well as emitting harmful gases which currently account for almost 4% of the world's greenhouse gas emissions.

Yours sincerely

Catherine and Ivar Matheson
