Dear Planners,

I am writing an email as the website doesn't appear to be working.

I am objecting to the development of a black-clad windowless cage that is being planned by developers at Utopia Village. This area is directly in the middle of the Primrose Hill Conservation area and will abut the houses on Chalcot Road and Egbert Street directly.

Apparently a "consultation exercise" was conducted over the summer which never mentioned this cage. The noise output of the equipment is 101 decibels as I'm sure you are aware—this is untenable in an area where people are trying to live quiet lives.

Independent experts believe the site is too small and the equipment too powerful for their plan to work and also feel the actual noise output will be far higher. They also seem to be ignoring the noise that will reverberate through the gardens even though Camden Policy says that this must be taken into account.

It is amazing and extremely worrying that this idea has got to the point where developers feel they can submit it.

I highly object to these crazy plans — please turn down this application.

Yours sincerely,

Linda Seward
