2023/3777/P	Michael Sheils	05/01/2024 15:06:19	OBJ	<p>I would like my objection to this planning application to be noted for this reason</p> <p>(1) The proposed area chosen for this installation is part of a light well that serves my bedroom and kitchen. One of the unforeseen consequences of this light well, is that it acts as a perfect audio chamber....every noise both intended and unintended is augmented... and combined with the office lighting that is on 24/7 will surely deprive me of any chance of a decent nights sleep.</p> <p>My health has suffered over many years of noise pollution from this office block, and although there is a new occupant in 24-28 Bloomsbury Way, the plan that they have envisaged for the running of this enterprise (24 hour access and usage)</p> <p>will certainly contribute to the downward spiral of my health.</p> <p>So please consider the well being of the tenants of Russell Chambers before making your decision.</p> <p>Many thanks, Michael Sheils</p>
2023/3777/P	Andrew McGowan	05/01/2024 13:15:16	OBJ	<p>I would like to oppose this planning application as it will have a detrimental impact on my daily life. I live in Russell Chambers and believe that the noise pollution created by the proposed installation of the air conditioning units poses a real and serious threat to my use, rest and enjoyment of my flat. The continuous noise will negatively impact my mental health and my ability to function properly at home. I believe that the proposed current location is totally unsuitable and will lead to an echo chamber of noise that will resonate throughout our residential block. We already have issues with noise and light pollution from 24-28 Bloomsbury Way and further distribution to our lives will be unbearable. I both work from home and sleep at the back of the building and believe this additional noise pollution will lead me and other residents to suffer from further stress and anxiety.</p>
2023/3777/P	Antony Gallion	06/01/2024 09:00:01	OBJ	<p>My neighbours and I (numbers 4,5 and 6 Russell Chambers) are absolutely horrified to hear of the proposed installation of air conditioning units in close proximity to our kitchens and bedrooms. In 2024 surely there are other, less intrusive options? Can't the corporate business in question have air conditioning installed inside the offices where we cannot hear it? Will you be installing secondary or double glazing in our properties so that we can't hear it? As you will be aware, noise pollution is a highly significant stressor, particularly as one of us has a disability and two of the others are quite elderly. We object to this installation- we believe it will seriously compromise our quality of life, and our mental health. This installation must NOT go ahead. A Gallion C Tilling R Harris</p>

2023/3777/P	rhys weyburne	07/01/2024 11:23:25	OBJ	<p>Hello, I am the Chair of The Russell Chambers Residents Association and would like to register my objection and make a few comments regarding the proposal to install air conditioning units in the lightwell at 24-28 Bloomsbury Way.</p> <p>While it may seem a small issue to approve a business application for these units, it has a very large impact on the residents of the 36 flats in Russell Chambers that adjoin the lightwell. The noise from the units is loud. How do we know this before the application has been approved ? Because they installed the units and starting running them without planning approval and only turned them off when the complaints found them out. We do not need neighbours who try to game the system and undermine the quality of life for the residents.</p> <p>Approval to run these units in their present location without better control over the noise levels would be a real issue for the residents. Given the fact that Camden Council are the owners of Russell Chambers, it would seem counter intuitive to reduce the value of your own asset by approving this application.</p> <p>Kind regards Rhys Weyburne</p> <p>On that</p>
