[REDACTED]

Objection to the erection of 4 welfare cabins including 5 x a/c condensers to south west side of cabins.  
2023/4791/P  
Land to the west side of Argyle Square London WC1H 8AS.

Dear David,

As a resident of 40 Argyle Square, I would like to object to the application in a personal capacity.

The welfare cabins have led to a clear loss of amenity to the inhabitants of the house. This is unequivocally shown by the actionable injury through the loss of light to my sister's study bedroom in the basement of the house.

The cabins have been causing light pollution, out-of-hours noise disturbances, loss of residential parking, and have blocked valued views of the square from the ground floor.

The cabins are detrimental to the setting of the surrounding listed buildings and the Bloomsbury CA. I also question the validity of the planning application through the slew of inaccuracies that are mentioned in the FoAS objection.

Best wishes,

Sam Reed MRICS
