

## SYSTEM SUMMARY

## Bauder XF301 Sedum System

### Lightweight sedum blanket system

Bauder XF301 Single Layer Sedum System is an ultra-light weight sedum system. Where the roof is laid to a fall of <2° the product can be laid directly onto the waterproofing. When laid on flat roofs, an additional drainage mat (SDF mat layer 3 below) is fitted. XF301 also contains a moisture mat which retains up to 5 Ltr of water/m<sup>2</sup>. The vegetation within the system is a mix of sedum varieties. Bauder’s “Green Roof Promise” is available for this system.

#### Where to specify:

Ideally suited to lightweight wooden roof decks or any building where weight and depth of system is critical.

**Please note:** All green roofs require water during times of drought. Bauder recommend that the watering and maintenance of this roof is considered and addressed during its design.
