2024/0091/L	H. Abraham	29/01/2024 19:16:20	COMMNT	<p>I have lived in this state for 12 years in total. I haven't come across many problems regarding heating and hot water systems and I don't see any better reasons why I needs 'upgrading'. This is my flat where I feel at home after a very stressful work. It will be extremely disruptive my daily life and my working pattern. I will not be able to feel comfortable to let people carrying out work without my presence nor will I be able to be off work while the work is ongoing.</p> <p>I am extremely worried how this 'new system' going to affect the look of my flat and what it means in terms of space in the future. My flat is a 1 bedroom flat that I share with my daughter. It has worked for us so far to accommodate two beds. However this will be extremely difficult with new radiators insulation; as it will definitely will take up space. Unless Camden provides me and people who are in my situation with two bedrooms accommodations somewhere else for the work to go ahead. I wouldn't not want my flat to be altered in any way that is disruptive and time consuming.</p> <p>Camden needs to came up with a better option for a green energy future rather than complicating the existing system that has worked and is working for almost 90 years.</p> <p>These states are unique, characteristic and made to last for generations to come. Not just the exteriorly, more of the interior as well. They have to be kept in the way they are without any major modifications while there are so many things that could be improved. For instance, the installing of double glazing windows which would not alter the look nor the layout. Cleaning the concrete exterior where possible to improve the exterior look and to give it a fresh look. Improving the CCTV system for better safety. Improving the waste disposal system and better staffing. Cleaning of the communal areas and lifts. Maintaining of the park area and so on.</p>
2024/0091/L	Mrs Janette Naylor	29/01/2024 17:29:21	OBJ	<p>Having been a long term resident on Rowley Way i thought i should comment on the proposed works to our estate by Camden which appears to go against the Grade 2* listed building rules and regulations which say that no internal or external works are to be carried out without permission from English Heritage. We have not received any of this from Camden or English Heritage if any of us as tenants or lease holders want to change anything in our homes we have to ask Camden for permission which is always refused unless the tenant or leaseholder is disabled in someway and need the conversion to assist with their living arrangements which is only the right thing to do</p> <p>I THEREFORE REJECT THIS PLANNING APLICATION IN ITS ENTIRETY AND ASK THE COUNCILLORS TO REJECT IT TOTALLY</p>
2024/0091/L	Robin Naylor	29/01/2024 17:19:45	COMMNT	<p>I have lived here for over 47 years and seen lots of changes here the most significant one was the estate gaining listed state GRADE 2*meaning that no alterations to outside or inside the estate could go ahead without prior approval by English Heritage and to this date i and no other tenant has received any form of notice from Camden from English Heritage on their behalf or even from English Heritage themselves telling us that they agree to this work and until they do so to each and every resident i will oppose any changes whatso ever to our lovely estate. A while ago we asked our estate team to erect some signs saying "NO BALL GAMES ALLOWED " around the estate and we were refused on the grounds of us living in a grade 2* listed building even though there were signs when we first moved here due to the amount of glass windows on the estate. I THEREFORE WISH TO OPPOSE THIS PLANNING APLICATION IN ITS ENTIRETY AND REJECT IT COMPLETELY</p>
