GREEN ROOFS DIRECT

Sedum Varieties List

Sedum Acre Aureum

This mat-forming Sedum is composed of tiny bright green leaves on short, ascending stems. It spreads itself, making it ideal for lush, bright coverage on a green roof. Its leaves are bright green with yellow young growth and there are starry yellow flowers in late spring and summer that come at the tips of the stalks.

Height: 10cm **Spread:** 25cm **Hardiness:** Fully hardy **Conditions:** Rain / Sun

Sedum Album Coral Carpet

Coral Carpet is a mat-forming, evergreen Sedum with small, fleshy, red-flushed leaves. In late spring to early summer, the leaves come alive with pink-tinted, white star-shaped flowers. Coral Carpet foliage is green, flushed red in all seasons. The use of this in our sedum blanket means vibrant and full colour all year round.

Height: 5cm **Spread:** 25cm **Hardiness:** Fully hardy **Conditions:** Rain / Sun

Sedum Album Athoum

The species is green foliage, with starry white or pink blooms held on wiry stems. Sedum album needs little water once established. This is the perfect base Sedum for our blankets and will form a bright green colony, perfect for a green roof.

Height: 5cm **Spread:** 30cm **Hardiness:** Fully hardy **Conditions:** Rain / Sun

Sedum Album Mini

The fact that this plant was originally found in the Faro Isles should tell you something about its hardiness, and also explains why it's so diminutive and tiny. Don't let its small size and saintly appearance fool you, this is one tough little plant. It displays all the same characteristics as Athoum.

Height: 5cm **Spread:** 10cm **Hardiness:** Fully hardy **Conditions:** Rain / Sun

Sedum Hispanicum

A very low, mat-forming Sedum with tiny silver-blue leaves. Starry pink to white flowers. Enjoys poor, well-drained growing medium so is ideally suited to live in our green roof substrate. Blooms in June. Evergreen therefore maintains its colour throughout winter.

Height: 5cm **Spread:** 10cm **Hardiness:** Fully hardy **Conditions:** Rain / Sun

Sedum Summer Glory

Lovely dense carpets of dark green foliage topped with vivid coral red flowers make this sedum a highlight of the green roof. Specially propagated each year in our nursery for the blankets, it bears fleshy rounded leaves that take on reddish tints in winter.

Height: 20cm **Spread:** 30cm **Hardiness:** Fully hardy **Conditions:** Rain / Sun

Sedum Relexum

The low-growing evergreen, spruce-like, succulent foliage stands out beautifully in our sedum blankets. Yellow flowers appear in July right through until mid October. To get this variety to reach maturity in time for sale we propagate Reflexum in plug form in our nursery and insert into the blanket. A time consuming job but we feel worth the extra effort.

Height: 25cm **Spread:** 20cm **Hardiness:** Fully hardy **Conditions:** Rain / Sun

Sedum Weihenstephaner Gold

Weihenstephaner Gold is a low-growing sedum that spreads to form an attractive ground cover for green roofs. Flowers appear on the reddish stems rising above the thick, triangular, succulent green leaves. The leaves turn purple in autumn and into winter, contrasting beautifully against the greens and blues.

Height: 15cm **Spread:** 10cm **Hardiness:** Fully hardy **Conditions:** Rain / Sun

Sedum Voodoo

A contrasting species with succulent leaves rising from a low growing mat. Leaves are rich deep red with a glossy appearance and held on succulent stems. This sedum was also selected for use in our blankets because its flowers are rich red, long lasting and born in early autumn. Helping us achieve 8 months of flowering over our blankets.

Height: 10cm **Spread:** 30cm **Hardiness:** Fully hardy **Conditions:** Rain / Sun
