2023/5339/P	Cynthia Rajaselvan	31/01/2024 20:01:51	COMMNT	I do not want this heating system because its obtrusive.
2023/5339/P	Shermin B	31/01/2024 23:31:00	COMMNT	<p>I strongly object to this planning application. First of all the description is misleading it only says (Replacement of existing single glazing with double glazing and associated works.) what exactly is associated works? We as tenants were never properly informed of what is going to truly happen with our heating system. People are so feed up with incompetent GEM "engineers" that the idea of having a thermostat inside a flat seems to good to be true and Camden council has used that to get people to think we at last are onto something! (wohoo we will finally be able to turn off/on our heating) but hang on a min what about when the heating gets turn off at the boiler house for almost half of the year?</p> <p>Many residents have no idea the impact this poorly planned/proposed infrastructure will have on them neither does Camden! this whole application needs to be cancelled. Camden needs to work closely with the residents and do a lot more research into heating systems for concrete flats otherwise you have set urself for a failure at the cost of Rowely Way residents!</p>
