2023/5338/P	Ana Maria Lavin-Parot	01/02/2024 15:51:32	INT	<p>This proposal is antiquated and not fit for purpose.</p> <p>The proposed system will never be able to replace the radiant heating wall and it will be a catastrophic waste of time and money as it has not been researched properly. It is based on inadequate radiators, inadequate boiler replacements, runs on oil and is linked to a central boiler that doe snot work.</p> <p>This building was created with radiant walls to prevent dampness and cold taking over the concrete. This proposed system has not taken this problem into consideration.</p>
