2023/5339/P	elizabeth knowles	01/02/2024 16:38:34	NOBJ	<p>I am supportive of new glazing -providing it is also sound proof.</p> <p>There are several factors that need to be taken into account however.</p> <p>Are you sure the Glazing will not be too heavy for the frames?</p> <p>Have you taken into account that the wood on the back of block 2 ( and others) has NEVER been repainted and as a result is almost splintered due to exposure to the elements?</p> <p>The actual casement windows on b2 were actually replaced ( no idea why) in the estate action bid over thirty years ago.</p> <p>These were always a poor fit unlike the original windows which were a beautiful snug fit, therefore you cannot put glazing into these frames.</p> <p>Are you aware of this?</p> <p>I would like a reply to the above please- Thankyou</p>
