2023/5338/P	TOKHIR DADAEV	02/02/2024 22:02:29	OBJ	<p>Service charges are already brutal, with these more upgrades it will be even more. Building works fine as is, no need for major works. I object.</p>
2023/5338/P	Robert Cross	02/02/2024 17:41:50	OBJ	<p>I disagree and object to Camden proposal in this planning application since it will still connect individual residences with a central boiler house feed complex. This means residences will not have control over their heating and will be subject to major breakdown across all residences when there is a breakdown in the boilers at the boiler house. Since it will be the same boilers in situ as at present Camden only have to review its own appalling record of boiler incident breakdowns to confirm this is not acceptable. This is not an improvement or progress towards a green initiative.</p>

2023/5338/P	The Gardens Trust (Alison Allighan)	05/02/2024 21:12:49	COMMNT	<p>This application has been brought to our attention by London Parks and Gardens Trust (LPGT), with whom we work very closely. As the the Statutory Consultee for all grades of historic designed landscapes included by Historic England on the Register of Parks and Gardens of Special Historic Interest, the Gardens Trust would have expected to have been included in this consultation, as the proposals affect Alexandra Road Park, registered at Grade II*. However, together with our colleagues in LPGT, we have considered the information provided in support of the application and on this occasion confirm we do not wish to comment on the proposals at this stage. We would however emphasise that this does not in any way signify either our approval or disapproval of the proposals. If you have any further queries, please contact us, and we would be grateful to be advised of the outcome of the application in due course.</p> <p>With kind regards, Conservation Casework Manager The Gardens Trust</p>
2023/5338/P	Carolina Ambida	02/02/2024 15:26:10	COMMNT	<p>I am against this proposal. It is expensive and high maintenance and not I line with climate change objectives. A more sustainable simpler less disruptive alternative has to be considered. Not this current one. I vote no.</p>
