2024/0286/L	elizabeth knowles	03/02/2024 09:59:44	OBJ	<p>The proposed alterations to the Alexandra road estate would be detrimental to the design of the grade two STAR listing. inside and out.</p> <p>I object to any pipes running up the walls inside my flat.. My flat is virtually original and needs to be treated with respect. he hius are specifically not suitable for bedrooms due to the noise- you know this. This whole thing needs to be taken back to the drawing board. It belongs in the last century . Camden should be ashamed of itself sprouting its green credentials while trying to fob residents off with poorly thought out plans and ignoring them whilst pretending to CONSULT.</p>
2024/0286/L	Robert Cross	02/02/2024 17:50:21	OBJ	<p>I disagree with and object to Camdnen proposals.The system proposed for hot water adn heating interface and pipework will still be using the central boilers with all their associated problems and breakdown history. It is not a progressive green solution by any means.</p>
2024/0286/L	Sara Bell	04/02/2024 16:45:09	COMMNT	<p>ALL of these works will severely and irreversibly harm all the 520 Grade II* listed interiors. You have not listened to the residents. You are not adhering to your very own environmental policies. You will cause fuel poverty. You will cause black mould. You are not thinking outside the box. You have no respect for this important world renowned building. It's a disgrace. It will simply be impossible for you to any of these works inside while people are living there.</p>
2024/0286/L	Amir Nassirzadeh	04/02/2024 17:58:25	OBJ	<p>Hello,</p> <p>I object to the planned works due to health and safety issues regarding the Asbestos within the flats. How do you plan on keeping the tenants safe in regards to the Asbestos? No information has been provided regarding this important issue. Camden has not stated what compensation will be given to tenants, that will have to remove current furniture that might not fit once radiators are installed. I also object to the fact that the heating bills will be increased by at least 3 or 4 times more than the current heating bill. I also object as it will alter the look of a listed building.</p>
