

Hi there

Im writing to formally object to the above planning application . I own the raised ground floor flat at no 50 Belsize Park Gardens. I have owned the flat for more than 20 years.

The proposed building would take away the beautiful view I have always enjoyed from my flat - which is currently onto green space and would instead mean my living room is directly facing another building.

I also believe the proposed building would reduce the light coming into my living room and bedroom since I am not even a full storey in height above the proposed building .

I am , understandably, extremely concerned about this application . London's green spaces are so precious and I do hope that the council will favor trees and greenery over development . The neighborhood is given its character by its scale . Sprawling and unchecked development can only harm the sense of community that we all enjoy.

Please feel free to contact me and if there is anything else I can do to prevent this proposed work I would love to know any further steps I could take

Many thanks in advance

Claudia Solti
