hi

Thanks for the consultation letter regarding proposal to fell a mature pine tree to the ground.

The tree is tall, very beautiful, quite unique and it is attracting a lot of birds. It is part of a green corridor between Lawn Road and Downside Crescent, right at the boundary of 16 downside crescent and 77 lawn road, and it creates privacy for both sides.

Quite of number of mature, big trees have been fell in the area lately, for different reasons and although some trees have been planted, they will take tens of years to get to the level of existing ones.

It would be a big loss for the community and this conservation area if the tree was fell to the ground, so I personally object to this planning.
yours respectfully,

Laura Bolohan
77 Lawn Road
