Dear Planners

I live at 35 Lambs Conduit Street and our property backs on to the garden at 20 Dombey Street. I am delighted that the owners have applied for permission to reduce the height and sides of the trees in the garden, as they are woefully overgrown. In particular, the fig tree (designated as T4 in the drawings) hangs over our flat roof and garden wall, dropping ripe figs and leaves, which we are then left to clean up. I am writing to ask that the tree surgeons in particular trim the branches away from our flat roof and garden in the hope that this nuisance will be reduced for a few years.

Thanks for your attention to this email.
