2023/5102/P	David Windisch	17/02/2024 22:07:35	OBJ	<p>As residents at 2 Collard Place, we object to the installation of a log burner at 13 Harmood Street (planning application 2023/5102/P).</p> <p>Studies have shown that the completely unnecessary use of wood burners makes a large contribution to air pollution and leads to a significant reduction of life expectancy across London. For example, we refer to the London Wood Burning Project led by Camden Council (https://www.camden.gov.uk/wood-burning-stoves). In light of these facts, it would be irresponsible to grant planning permission to the installation of additional wood burners in such a densely populated area. The house is well connected to gas and electricity, so there is no need to create a nuisance for other residents of the area by burning wood or fuel.</p> <p>Our family would be directly affected by the installation, because the proposed exhaust flue would be at a distance of only 20m from our windows. We will therefore seek an abatement notice if the proposed installation goes ahead and is used.</p>
