

Schwegler 1SP

1:20

Suitable for: House and Tree Sparrows, and in some instances other birds which use nest boxes such as Tits, Redstarts and Spotted Flycatchers. Dimensions of the three brood chambers: H 16 x W 10.5 x D 15 cm (each). External dimensions: H 24.5 x W 43 x D 20 cm.

Siting: On all types of houses in built-up areas, and on industrial and agricultural buildings such as barns, sheds and factories. Installation height: 2 metres or more above ground level. By turning the safety catch by 180° the front panel can be removed.

Material: SCHWEGLER wood-concrete. Weight: approx. 15 kgs Order no. 00 590/8

Schwegler 2HW

1:20

Secure against Magpies and Jays (with nesting chamber insert). Suitable for: Black Redstart, Pied Wagtail, Grey Spotted Flycatcher, occasionally Robin and Wren. External dimensions: H 20 x W 20 x D 30 cm. Nesting chamber: 15 x 21 cm.

This particularly deep box can be hung at an open site or against outside walls. A wooden insert, which can be removed for inspection and cleaning purposes, gives protection against predators because nesting takes place at the far end of the box. The design of the 2HW also ensures quick occupation when hung in relatively dark places due to the wide entrance. It can also be used to attract Dippers and Grey Wagtails provided that the wooden insert is removed. The ideal location for Dippers and Grey Wagtails is near to natural running water and under bridges.

Material: SCHWEGLER wood-concrete.

Scope of delivery: Nestbox, wooden insert, galvanized hanger and aluminum nail. Weight: approx. 5.1 kgs. Order no. 00 157/3
