

SEMPERGREEN®

BEES & BUTTERFLIES BLANKET

MATERIAL

The Sempergreen® Bees & Butterflies blanket comprises four types of Sedum, five to seven types of ornamental grasses and a mix of more than forty perennial plants and herbs. A minimum of 60% of this mix is always present in each blanket. The plants grow on a biodegradable coconut fibre mat and a special substrate developed by Sempergreen®. The blankets boast at least 95 % coverage upon delivery. Sempergreen® vegetation blankets are produced in accordance with FLL guidelines.

ABOUT THE VEGETATION

A wide variety of host plants and mellifluous plants have been selected especially for the Bees & Butterflies blanket, with different flowering periods ranging from early spring to late autumn. The mellifluous plants provide butterflies and bees with valuable nutrition.

The host plants form an essential link as food for caterpillars in their development from eggs into butterflies. The Bees & Butterflies blanket contains no pesticides whatsoever, due to which they contribute to the reproduction and survival of bees and butterflies.

INSTALLATION AND MAINTENANCE

The Sempergreen® Bees & Butterflies blanket is very easy to install. The Bees & Butterflies blanket can be installed on sloping surfaces up to 10 degrees.

After installation, it is necessary to fully saturate the blanket with water. When installed in a dry spring or summer, please irrigate the blanket in the first weeks after installation. The (minimum) maintenance depends on the applied build-up of the system (fertilize 1-3 times per year with a long-acting fertilizer).

TECHNICAL DATA:

Coverage:	95 %
Weight when dry:	15-20 kg/ m ²
Saturated weight:	20-25 kg/ m ²
Thickness blanket:	3-5 cm
- When flowering:	20-35 cm
Standard sizes:	120 cm x 200 cm
Number of m ² /pallet:	max 40 m
Pallet size:	130 cm x 110 cm
Type of substrate:	biodiverse
