

SEMPERGREEN® SEDUMMIX BLANKET

MATERIAL

The Sempergreen® Sedum-mix blankets comprise eight to twelve different species of Sedum. The plants grow on a biodegradable coconut fibre carrier and a special substrate developed by Sempergreen®. The blankets boast at least 95% coverage upon delivery. Sempergreen® vegetation blankets are produced in accordance with FLL guidelines.

ABOUT THE VEGETATION

The sebaceous Sedum plants are adept at storing water in their leaves and are therefore extremely suitable for varying weather conditions.

INSTALLATION AND MAINTENANCE

Sempergreen® vegetation blankets are very easy to install (download the installation instructions from our website!). Sedum-mix blankets can be installed on sloping surfaces of up to 25 degrees. Their (minimum) maintenance depends on the build-up of the system (fertilise one to three times per year).
