2024-03-05

Dear Kristina,

**TOWN & COUNTRY PLANNING ACT 1990 (AS AMENDED)
NATIONAL PLANNING POLICY FRAMEWORK 2021**

100 and 100a Chalk Farm Road

Demolition of existing buildings and redevelopment of the site to provide two new buildings of between 6-12 storeys: one containing affordable homes (Class C3) and one (with three cylindrical volumes) containing purpose-built student accommodation with associated amenity and ancillary space (Sui Generis), a ground floor commercial space (Class E) together with public realm, access, plant installation, and other associated works.

Recommend Archaeology Condition(s)

Thank you for your consultation received on 2024-02-14.....

The Greater London Archaeological Advisory Service (GLAAS) gives advice on archaeology and planning. Our advice follows the National Planning Policy Framework (NPPF) and the GLAAS Charter.

Assessment of Significance and Impact

Historic England, 4th Floor, Cannon Bridge House, 25 Dowgate Hill, London EC4R 2YA

The planning application lies in an area of archaeological interest (Archaeological Priority Area) identified in the Local Plan: [77211] Regents Canal and Rail Infrastructure

The site is located within the Tier 2 'Regents Canal and Rail Infrastructure' Archaeological Priority Area (APA). The APA is allocated to Tier 2, as it contains the canal itself along with a range of post-medieval buildings, structures and remains of industrial works and warehouses associated with the historic use of the canal and railways. The Grade II* Listed Round House and the unlisted but associated 19th century boundary walls on the site contribute to the significance of this APA.

Significant archaeological remains are not expected on the site, but ground reduction associated with the proposed development may reveal remains of Victorian railway structures of industrial archaeological interest including structures abutting the roundhouse, viaduct arches or railway features.

Planning Policies

NPPF Section 16 and the London Plan (2021 Policy HC1) recognise the positive contribution of heritage assets of all kinds and make the conservation of archaeological interest a material planning consideration. NPPF paragraph 194 says applicants should provide an archaeological assessment if their development could affect a heritage asset of archaeological interest.

NPPF paragraphs 190 and 197 and London Plan Policy HC1 emphasise the positive contributions heritage assets can make to sustainable communities and places. Where appropriate, applicants should therefore also expect to identify enhancement opportunities.

If you grant planning consent, paragraph 205 of the NPPF says that applicants should record the significance of any heritage assets that the development harms. Applicants should also improve knowledge of assets and make this public.

Recommendations

The significance of the asset and scale of harm to it is such that the effect can be managed using a planning condition.

I therefore recommend attaching a condition as follows:

Condition	No demolition or development shall take place until a written scheme of investigation (WSI) has been submitted to and approved by the local planning authority in writing. For land that is included within the WSI, no demolition or development shall take place other than in accordance with the agreed WSI, which shall include the statement of significance and research objectives, and

HistoricEngland.org.uk

Please note that Historic England operates an access to information policy.

Correspondence or information which you send us may therefore become publicly available.

- A. The programme and methodology of site investigation and recording and the nomination of a competent person(s) or organisation to undertake the agreed works
- B. Where appropriate, details of a programme for delivering related positive public benefits
- C. The programme for post-investigation assessment and subsequent analysis, publication & dissemination and deposition of resulting material. This part of the condition shall not be discharged until these elements have been fulfilled in accordance with the programme set out in the WSI

Informative The written scheme of investigation will need to be prepared and implemented by a suitably professionally accredited archaeological practice in accordance with Historic England's Guidelines for Archaeological Projects in Greater London. This condition is exempt from deemed discharge under schedule 6 of The Town and Country Planning (Development Management Procedure) (England) Order 2015.

This pre-commencement condition is necessary to safeguard the archaeological interest on this site. Approval of the WSI before works begin on site provides clarity on what investigations are required, and their timing in relation to the development programme. If the applicant does not agree to this pre-commencement condition please let us know their reasons and any alternatives suggested. Without this pre-commencement condition being imposed the application should be refused as it would not comply with NPPF paragraph 205.

I envisage that the archaeological fieldwork would comprise the following:

Watching Brief

An archaeological watching brief involves observation of groundworks and investigation of features of archaeological interest which are revealed. A suitable working method with contingency arrangements for significant discoveries will need to be agreed. The outcome will be a report and archive.

You can find more information on archaeology and planning in Greater London on our website.

This response relates solely to archaeological considerations. If necessary, Historic England's Development Advice Team should be consulted separately regarding statutory matters.

Yours sincerely
