

DESIGN DRAWING
IN DEVELOPMENT

0 1 2 3 4 5m

GROUND FLOOR LEVEL

Ground Floor Level - New LV Rooms GA Layout - Scale 1:50 @ A1

DRAWING/SPECIFICATION NOTES:

1. Please do not rely on accurate scaling directly from the drawing as copy/printing can affect scaling. Always check dimensions on site.
2. This drawing is best reproduced in A1 size. All layouts are drawn in order to best differentiate the various system elements noted and therefore it is strongly recommended that drawings are also printed in colour.
3. For details of other electrical design elements for this project as applicable, please refer to the drawing and document issue sheet information for the project.
4. The existing building base layout information is as provided by BT.
5. All works noted shall comply with any site specification and/or manual requirements unless not applicable or agreed to be amended/modified by way of a formally confirmed contract.

TECHNICAL NOTES:

1. Handing around the miscellaneous cable equipment items indicates the minimum access and maintenance space required around each item of equipment which must be allowed. Space requirements may also be provided in the equipment manufacturer's literature and shall also be identified and afforded when coordinating with other services elements.
2. All layouts are subject to structural visibility assessments.
3. All spaces are subject to architectural visibility and comparison assessments.
4. All layouts are subject to detailed ELK site validation checks.
5. All layouts are subject to design compliance checks via specialist corporate providers.
