

Hi All,

I just wanted to raise an issue with peoples ability to raise objections on planning application 2023/5391/P (Stay Club looking to building an additional student accommodation floor).

While I have been successful with my objection - speaking with members of the IARA and Holmes Road community forums there have been numerous issues (with something called Cloudflare ans well as with objections not being posted online).

This is really concerning as it would be extremely worrying if an objectionable application that is not wanted by the community is allowed to pass due to a Camden IT systems issue. The developer is trying to push this through a third time - while already expanding their operations on Cathcart street.

Can someone please look in to the issue? And perhaps extend the objection/ time window to compensate? I'm happy to have a call if helpful to explain.

Kind regards,
Chris.
