I am writing to express my strong objection to the proposed construction of an additional top floor in the Darwin Court house located in front of my residence at 41 Gloucester avenue. After careful consideration, I believe that this development would have several adverse effects on the surrounding community and its residents. One significant concern I have is the obstruction of natural sunlight that would result from the construction of the additional top floor. The increased height of the neighboring building would cast shadows over my home, significantly diminishing the amount of sunlight that reaches my living spaces which really impacts our daily life and well-being. Furthermore, the construction of an additional top floor would have a detrimental impact on the aesthetics and character of our neighborhood. The proposed structure would disrupt the skyline and detract from the charm and visual appeal of our residential area. Moreover, the construction process itself would pose numerous challenges and inconveniences for myself and other neighbors. Noise, dust, and debris generated during the building phase would disrupt the peace and quiet of our daily lives. Additionally, increased construction traffic and parking congestion would create safety hazards and inconvenience for residents in the vicinity. In light of these concerns, I respectfully urge you to reconsider the decision to move forward with the construction of an additional top floor. I believe that alternative solutions should be explored that are more in line with the best interests of the community and its residents. Thank you for taking the time to consider my objections.

Sincerely,
Agne Sylejmani
