Sedum blanket: 100% coir, 8– 12 varieties of sedum

Sedum varieties: Sedum album, Sedum hybridum, Sedum floriferum, Sedum ellacombianum, Sedum selskianum true, Sedum pulchellum, Sedum reflexum, Sedum middendorffianum, Sedum montanum, Sedum montanum orientale, Sedum sexangulare, Sedum acre, Sedum spurium 'Coccineum'

### Maintenance

- Thorough watering upon installation, repeat once every week for first 6 weeks
- During growing season, check roof for any tree seedling every 3 weeks and remove. Removal of any fallen leaves, rubbish or winter detritus.
- Feed with organic purpose made sedum roof feed twice a year, beginning and end of Spring.
- Dead head sedum blanket by removing woody flower stems and heads in autumn, improving the appearance of roof over winter.
- If roof has turned reddish brown (caused by drought or cold winter), apply low dose of Nitrogen fertiliser.
- During a sustained period of drought, thoroughly water the sedum mat once every 10 days.
