2024/1078/P	Christopher Pask	22/04/2024 08:23:04	COMMNT	Dear Sirs,

After a protracted period of quite undeserved lack of use and insensitive suggested alternative uses this scheme provides an excellent, sensitive and varied reuse of this iconic local building.

The street presence and vitality of one of the largest single entities on Hampstead High Street/Rossllyn Hill will reinvigorate the immediate locality without creating the potential issues of traffic and disturbance of conversion to educational use as previously proposed.

The physical alterations proposed appear sensitive to the historical form of the building confining interventions to the rear where they are invisible from the public realm and in fact rectify some of the terrible alterations undertaken during the life of the police use of the building.

I believe the proposals present an excellent way for this significant Hampstead landmark to be elegantly rehabilitated and given a sustainable future for generations to come and should be supported.

Yours sincerely,  
Christopher Pask
