London
N1C 4AG

Dear Sirs,

28 Canfield Gardens London NW6 3LA

My Name is Martin Redston. I am a Chartered Civil Engineer (CEng) specialising in the design of new and retrofit basement construction together with associated building refurbishment. I have worked on such projects in the London Borough of Camden for more than thirty years. I am the principal of Martin Redston Associates and have been Chartered since 1978.

I have undertaken a professional review of the Flood Risk Assessment prepared by Sanderson Associates dated 23rd March 2020 for the above property. I am satisfied that the scope and methods used form a risk based approach and are appropriate and all tests have been followed in this instance. I am therefore able to fully support the conclusions and recommendations set out at section 7 of the report.

Yours sincerely,

M A Redston
