

HERITAGE SLIDING SASH WINDOWS

Heron Joinery[®]

Crafting Beauty & Warmth

Heron Joinery has worked on numerous conservation projects throughout the UK. These include projects such as The Old Police House for Royal Parks in Hyde Park, listed schools and public buildings throughout Royal Greenwich Borough and the redevelopment of St Clements Hospital in Tower Hamlets. We have also worked widely across Edinburgh with Castlerock Housing Association in support of their refurbishment programmes of their listed stock of properties.

Working on conservation projects takes time and involves working with a broad range of people. Each project has its own unique requirements to match existing sight lines, horn detail, colour etc. We will provide support throughout the planning application by providing drawings and working samples for approval.

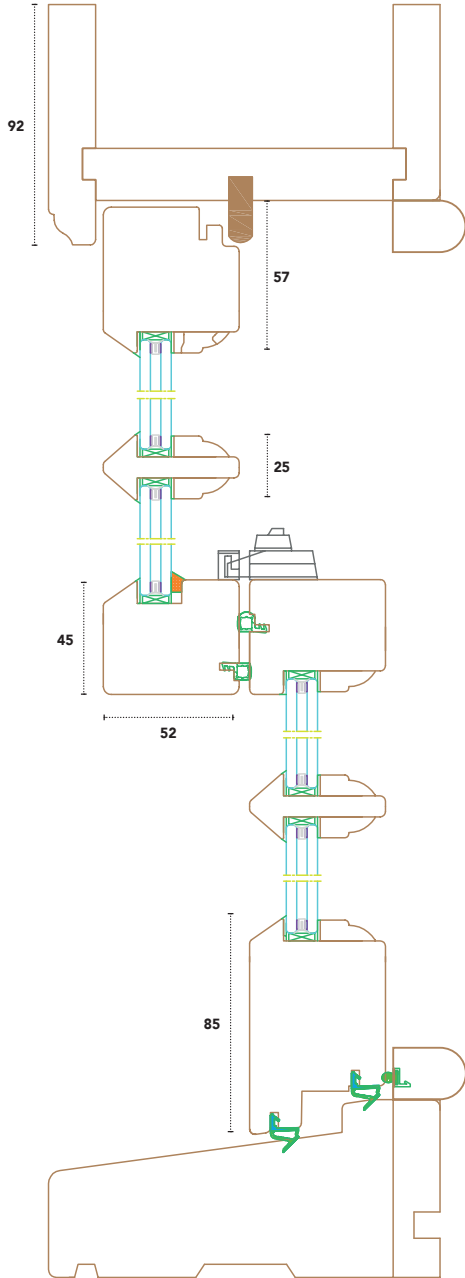

Whilst each project is unique, there are a number of features of our Heritage Sliding Sash which include;

- Individual window sections treated with a double vac preservative which means windows can last up to 60 years.
- Single and slim double glazed options.
- 12mm, 14mm & 16mm slim double glazed options (to match existing single glazed sightlines), fully CE marked.
- 8mm upstand on glass units fitted into slim glazing bar to maintain sightlines.
- Declared conformance with Construction Product Regulations - Harmonized Standard BS EN 14351+A1 and CE marking supported with a Declaration of Performance for the slim units.
- Acoustic rating of 32db.
- Hardware and fixings subject to corrosive compliance with BS EN 1670.
- Discreet draught, noise and dust barriers.
- Ventilation options available meeting Building Regulation Approval Document Part F and complying with BS EN 13141.
- Internally glazed.
- Putty line glaze sash profile.
- Bespoke horn options.
- Range of extension cills available to suit individual project needs.
- Finished windows available in a range of high performance, durable stains or paint finishes to agreed customer specification.
- Dual Colour option.
- Hardwood frame cill as standard.
- Spiral balance or corded and weight options.
