2024/1488/P	Matteo Sotti	13/05/2024 08:08:03	OBJ	<p>I am resident in Goldhurst Terrace for 20 years; twice in the past I had asked planning permission to create one off-street parking space at the front of the property (2007/1939/P and 2008/0626/P) and twice it was refused because "The creation of a new vehicular entrance, by virtue of its associated loss of boundary wall and use of the front garden for car parking, is considered to be detrimental to the character and appearance of the street scene and the Swiss Cottage Conservation Area". And there was not even the loss of a residents parking bay at the time as there was a yellow line in front of my property. I wonder how this case would be different.</p> <p>I also park my car on the street, and very often I struggle to find a residents parking space free, hence the loss of one more such space will only make matters worse.</p>
